# Photoshop and Lightroom for Photographers

The way we process photographs has changed significantly in the last decade. As the use of film has waned, most photographers must now master sophisticated digital processing software. This course guides you through the essentials of Adobe® Lightroom® and Adobe Photoshop®—the most popular digital photo processing software available today. Professional photographer Bob Warren introduces the fundamentals of these programs, discusses electronic photo editing and reviews essential tools for manipulating images. We explore topics such as using Adobe Lightroom as a pre-processor, the Photoshop interface, retouching, color balance and resizing. The first half of the course covers Lightroom and the second half covers Photoshop. Based on the Creative Cloud® version of Adobe products, the course is appropriate for beginning and intermediate users of Photoshop and Lightroom.

**NOTE:** Participants must bring a Mac or PC laptop to class, preloaded with the Adobe Creative Cloud suite and with Photoshop and Lightroom installed. The cost of a subscription to these programs is approximately \$10/month and is not included in the course fee. Information on installing these programs is provided upon registration.

## INSTRUCTOR

**Bob Warren, M.L.A.**, is a professional photographer with more than 30 years of experience in still-life, fine art and documentary photography. He has taught classes in studio lighting, intermediate photography, Adobe Photoshop and Lightroom and is one of the owners of Houston Skyline Studio. Mr. Warren holds a master's degree in liberal arts from the University of St. Thomas.
